

Saliva DNA Collection Kit

01 Simple, efficient non-invasive saliva sample collection kit

02 Ensures optimal sample integrity and high-quality results

03 Room temperature storage

04 Proven sample stability for up to 30 days at 30°C

05 User-friendly collection procedure

06 Compatible with all DNA isolation methods

07 CE IVD guarantees high standards and quality

A CE-IVD marked, self-collect non-invasive saliva sample collection and preservation kit for human DNA testing.

AviCollect SS enables analysis and/or research of human DNA using multiple molecular applications including PCR, qPCR, SNP, genotyping, microarrays, Sanger sequencing, next-generation sequencing and whole genome sequencing.
